EDUCATION

Hindustan Institute of Technology and Science, Chennai.

MTech in Aeronautical Engineering.

Sep 2021 – Apr 2023

CGPA 9.55

Saranathan College of Engineering, Anna University, Tiruchirappalli.

B.E in Mechanical Engineering.

Jul 2017 – Jun 2021

CGPA 8.57

SKILLS SUMMARY

- **Design Software:** Draftsight , Solidworks.
- **FEA Software:** Ansys MADPL, Ansys workbench (Linear and Nonlinear Analysis Structural Analysis)
- **Programming Skill:** Python, MATLAB and Excel-VBA.(BEGINEER LEVEL)

WORK EXPERIENCE

Engineer Design (Mechanical)-Dynaspede Integrated Systems Pvt. Ltd

Nov 2023 – Present

- Contributed in multiple projects, load test rigs for Tata Transaxle and EOL for EV motors in which modeling assembly units using GD&T (ISO standards).
- Modeling a Test bed for testing Power Hydraulic Steering for 8033, 8037 & M033 models for ZF group. It includes Air leak test station, Functional test station, High pressure station and Oil draining station.
- Modeling chain drive & power raised conveyors with different speeds for load carrying materials.
- Implemented pneumatic circuits for automation projects, improve system productivity & reduce downtime.

Student Intern-AvironiX Drones

Jul 2022 – Mar 2023

- Using the explicit analysis in ANSYS the stress developed in the landing gear of the drones are reduced using wave spring.
- Using ANSYS software, stress analysis and amplitude of periodic load of drones are carried out.

PROJECTS

Experimentally investigation of crest to crest wave spring and lattice structure with enhancing load bearing capacity.

Apr 2023 – May 2023

- Five lattice structures were manufactured using MJF additive manufacturing, assembled and tested in a UTM to identify the optimized structure with high plateau stress. <https://doi.org/10.1007/s40430-024-04936-5>

Development and Analysis of Polymer based wave springs with different thickness and different infill density.

Mar 2022 – Mar 2023

- The study revealed that thicker wave springs exhibited significantly increased stiffness compared to variations in infill density.

Experimental Investigation of process parameters in TIG Facing of AlCoCrFeNiCu over Stainless steel.

Jan 2022 – May 2022

- This study compared the AlCoCrFeNiCu high entropy alloy to stainless steel, revealing an 18% hardness increase and 50% improvement in wear resistance, with SEM analyses conducted before and after testing.

ACADEMIC ACHIEVEMENTS

Mega ATV Championship –Autosports India.

Mar 2019

As a team member in Suspension and made the whole-body chassis covering using acrylic sheet.

Project Expo –SCE

Sep 2019

Manufactured Gearless Transmission (Elbow Mechanism) acheived fourth place in that event.
